## Physicians See A Difference

"Health Motion's therapist was able to assess my musculoskeletal system in 15 minutes, determine the problem areas, develop a treatment plan, and apply therapy at my initial visit. After 30 minutes, 50% of the total problem areas were functional and pain-free. Health Motion's treatment model correlates with the natural body's healing processes when the body isn't able to heal itself."

- Amanda Huver, DO
